A-Boligtyperne

Der findes 5 forskellige A-typer. Den ene type er supplementsrummet, der har egen indgang.

Hvor supplementsrummet er placeret på en 1. sal, er der udvendig trappe.

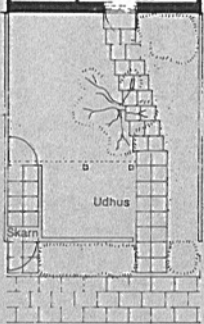

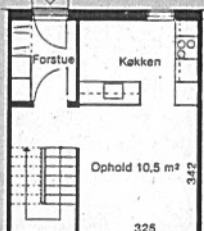

Supplementsrummets sammenlægning med hovedlejemålet er forberedt i husenes konstruktion.

Udvidelse

Som noget nyt inden for almennytnyttigt boligbyggeri har VA gennem byplanvedtægten sikret sig ret til at udvide enkelte boligtyper i Hyldespjældet.

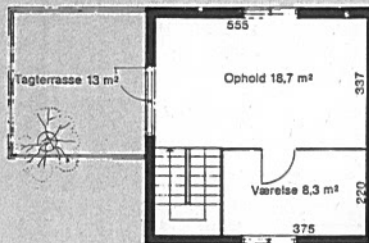

Boligtyperne A7, A8 og A9 er forberedt for senere tilbygning.

Et eksempel på tilbygning er vist på skitsen. Den kan supplere boligen med et ekstra rum eller den kan bruges til udvidelse af opholdsstuen.
